

Portfolio Assessment Report

Candidate: Nuzhat Khan

Portfolio URL: <https://nuzhat-portfolio-alpha.vercel.app>

Assessment Date: June 29, 2026

Assessor: Technical Screening Panel

Executive Summary

Nuzhat Khan's portfolio is a visually impressive, professionally designed website built with Next.js and Framer Motion. The dark navy theme with teal accents, animated boot sequence, and video intro create a strong first impression. However, the portfolio suffers from critical content gaps — a broken email link, missing LinkedIn, only 3 of 6+ projects showcased, and no case studies or quantified outcomes. The design quality is exceptional (9/10) but the content depth is below average (5/10), creating a significant mismatch between visual polish and substantive value.

Overall Portfolio Rating: 6.6 / 10

Dimension	Score	Notes
Design & Visual Quality	9/10	Professional, modern, dark theme on-trend
Content Depth	5/10	Too thin, missing case studies
Project Showcase	5/10	Only 3 of 6+ projects shown
SEO & Meta Tags	7/10	Good OG tags, description present
Contact & CTA	4/10	Broken email, no LinkedIn, no resume download
Mobile Experience	8/10	Responsive, good breakpoints
Uniqueness	8/10	Video intro + boot animation = memorable
Technical Implementation	8/10	Next.js SSR, Framer Motion, clean code

Section-by-Section Review

1. Hero Section

What works:

- Clean name + role tagline ("Fullstack Developer - Mumbai")
- Animated boot sequence with "NK_" cursor is memorable
- Video intro (portfolio-intro.mp4) is a unique differentiator

Issues:

- Video has no caption or context — viewer does not know what they will see
- No CTA below the fold — "View My Work" or "Download Resume" button missing
- Grid background pattern is nice but slightly distracting on mobile

Rating: 7/10

2. About Section

What works:

- Clear 3-paragraph bio structure
- Timeline cards (Education, Infomatics, Building & Shipping) add visual interest
- "I don't just write code — I own projects end to end" is a strong line

Issues:

- Paragraph 1 is generic — "fullstack developer based in Mumbai" could be anyone
- No quantified achievements — "making sure things ships" but no numbers
- Timeline is sparse — no specific dates or durations

Rating: 6/10

3. Projects Section

What works:

- Clean card layout with tech stack tags
- Live project links work (both verified: attendance-sigma-one.vercel.app and nsasports.co.in return HTTP 200)
- Status badges (Live, UAT, Production) add context

Issues — CRITICAL:

- Only 3 projects shown (Compulse, Biometric, NSA Sports)
- Missing from portfolio: CAS Parser (Python + Tauri desktop app), HospitalSop Portal, Novus Comply / Novus UPSI
- No case studies or "Challenge -> Solution -> Result" storytelling
- NSA Sports description is only 1 sentence — too thin
- No screenshots or demo images — just text cards
- No metrics: no user counts, no performance data, no business impact

Rating: 5/10

4. Skills Section

What works:

- Well-organized into 7 categories

- Glassmorphism pill tags look premium
- Hover effects add interactivity

Issues:

- "Go" listed under Languages but no Go project exists on GitHub or in projects — looks like padding
- "Python ML" is vague — what specifically? Scikit-learn? PyTorch? Pinecone? (Resume mentions these but portfolio does not)
- Missing skills from resume: PyMuPDF, tabula-py, Pandas, ZKTeco SDK, Pinecone, FAISS, Whisper
- AI/ML section is thin — only 4 items vs resume's 8+

Rating: 6/10

5. Contact Section

What works:

- Clean CTA layout with email and GitHub buttons
- GitHub link works correctly (opens Naazkn13 profile)

Issues — CRITICAL:

- Email link is BROKEN: href="mailto:your@email.com" — this is a placeholder!
- LinkedIn link completely missing — not in navbar, not in contact, nowhere
- No resume/CV download button
- No phone number or alternative contact method
- Copyright says "2025" — should be 2026

Rating: 3/10

Live Projects Verification

Project	URL	Status	HTTP	Load Time	Notes
Biometric Attendance	attendance-sigma-one.vercel.app	Live	200	0.31s	Login required — cannot verify functionality
NSA Sports	nsasports.co.in	Live	200	0.91s	Public site, accessible
Portfolio	nuzhat-portfolio-alpha.vercel.app	Live	200	<1s	Fully functional

All three sites are live and responding. This is a strong signal — the candidate actually deploys and maintains production systems.

GitHub Profile Analysis

Username: Naazkn13

Total Public Repos: 10

Total Stars: 0

Total Forks: 0

Repository	Language	Last Updated	Description
nuzhat-portfolio	TypeScript	Jun 29, 2026	Portfolio source code
biometric-attendance-system	HTML	Jun 3, 2026	ZKTeco biometric platform
Client-Status-Tracker	TypeScript	May 19, 2026	Client tracking tool
agentbox-ai	Python	Apr 28, 2026	AgentKit fork with OpenCode
java-qr-attendance-system	Java	Apr 28, 2026	QR attendance desktop app
payroll-slip-generator	JavaScript	Apr 28, 2026	Excel salary processing
nsa-sports-platform	JavaScript	Apr 28, 2026	Sports operations platform
Naazkn13	None	Apr 28, 2026	Profile README
Skin_disease_prediction	None	Jan 16, 2025	ML prediction project
animated-head-portfolio	None	Jan 14, 2025	Earlier portfolio version

GitHub Signals:

- Consistent commit activity (Apr-Jun 2026)
- Mix of Python, TypeScript, JavaScript, Java — validates fullstack claim
- 0 stars/forks — no community engagement, but expected for a junior developer
- Repos match resume claims — good consistency

Resume vs Portfolio Consistency

Element	Resume	Portfolio	Match
Name	Nuzhat Khan	Nuzhat Khan	Match
Role	Fullstack Developer	Fullstack Developer	Match
Email	knuzhat136@gmail.com	your@email.com	MISMATCH — broken
GitHub	Naazkn13	Naazkn13	Match
LinkedIn	Listed in resume	Not present in portfolio	MISSING
Projects	6+ projects	3 projects	INCOMPLETE
Skills	30+ items	~25 items	Partial
Education	BSc IT, 2024	BSc IT, 2024	Match
Experience	Infomatics, Jun 2025	Infomatics, 2025	Match

Consistency Score: 6/10 — Major gaps in email, LinkedIn, and project count.

Competitive Benchmark

Portfolio Element	Nuzhat	Industry Best Practice
Load time	<1s	<2s (Pass)
Mobile responsive	Yes	Required (Pass)
HTTPS	Yes	Required (Pass)
Contact email	Broken	Must work (Fail)
LinkedIn link	Missing	Must have (Fail)
Resume download	Missing	Must have (Fail)
Project count	3	5-8 recommended (Below)
Case studies	0	2-3 recommended (Fail)
Testimonials	0	1-3 recommended (Fail)
Blog/writing	None	Bonus (N/A)
Video intro	Yes	Rare and impressive (Pass+)
Unique design	Yes	Stands out (Pass+)

Impact Analysis

Positive Signals for Employers

1. Portfolio EXISTS and is live — already ahead of 50%+ of junior candidates
2. Design quality signals craft意识 and attention to detail
3. Video intro is memorable and unique — differentiation in a crowded market
4. Boot animation shows JavaScript/animation skills
5. Both live projects verified accessible — proves deployment ability

Negative Signals for Employers

1. Broken email = "Did they even test this?" — signals carelessness
2. No LinkedIn = missing professional network proof
3. Only 3 projects = "Where is the rest of the work?"
4. No case studies = cannot assess problem-solving depth
5. No resume download = extra friction for busy recruiters

Net Assessment

The portfolio is currently a **missed opportunity**. The design quality gets a recruiter's attention, but the content gaps cause them to leave within 30 seconds without meaningful engagement. With 4 targeted fixes (email, LinkedIn, resume download, 2 more projects), this portfolio would be a genuine competitive advantage.

Priority Improvement Roadmap

Immediate (30 minutes)

#	Fix	Impact	Effort
1	Fix email link: your@email.com -> knuzhat136@gmail.com	Critical	2 min
2	Add LinkedIn link to navbar + contact section	Critical	10 min
3	Add "Download Resume" CTA button	High	10 min
4	Fix copyright year: 2025 -> 2026	Low	1 min

Short-term (1-2 days)

#	Fix	Impact	Effort
5	Add CAS Parser project card	High	30 min
6	Write case study for Compulse (Challenge-Solution-Result)	High	2 hours
7	Write case study for Biometric Attendance System	High	2 hours
8	Remove "Go" from skills (no project to back it up)	Medium	5 min
9	Add missing skills: PyMuPDF, tabula-py, Pinecone, FAISS	Medium	10 min
10	Add metrics to all project descriptions	Medium	1 hour

Medium-term (1 week)

#	Fix	Impact	Effort
11	Add project screenshots/images	High	2 hours
12	Add 1-2 client testimonials	Medium	1 hour
13	Add "Currently Building" section	Medium	1 hour
14	Improve meta description for SEO	Low	10 min
15	Add blog section for technical writing	Low	Half day

Expected Impact of Fixes

Metric	Current	After Immediate Fixes	After Full Roadmap
Portfolio Rating	6.6/10	7.8/10	8.8/10
Recruiter Dwell Time	~30 sec	~1 min	~3 min
Contact Conversion	0% (broken)	5-10%	15-20%
Project Credibility	Medium	High	Very High

Final Verdict

Portfolio Rating: 6.6 / 10

Nuzhat has built something visually exceptional that most junior developers cannot match. The design quality, animation work, and video intro demonstrate real frontend craft. However, the portfolio is currently underperforming its potential by 2 full points due to content gaps and a critical broken email link.

Recommendation: Portfolio needs 4 immediate fixes before being used for job applications. The design foundation is excellent — this is a content problem, not a technical one.

Category	Current	Potential
Design	9/10	9/10 (already excellent)
Content	5/10	8.5/10 (with case studies + metrics)
Contact/CTA	4/10	9/10 (with email + LinkedIn + resume)
Overall	6.6/10	8.8/10 (achievable in 1 week)

The gap between current state and potential is entirely fixable with focused effort. This portfolio, fully realized, would be a genuine asset in the job market.
