

Nuzhat Khan

Fullstack Developer · Compliance & Enterprise Systems · Mumbai

knuzhat136@gmail.com · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Fullstack developer with 1+ year shipping enterprise compliance platforms for the BFSI sector. Built and deployed multiple live products at Infomatics Services spanning insider trading detection, regulatory reporting, and financial document processing. Works end to end — architecture to deployment — with no handoffs, and independently ships production systems for freelance clients on the side.

EXPERIENCE

Software Developer

Infomatics Services Pvt. Ltd. · Mumbai

June 2025 – Present

- **Novus Comply** — Insider trading & compliance platform handling trade pre-clearance, multi-tier approvals, and ECAS/BENPOS/KFin/CAMS reconciliation across 4 data sources to flag unauthorised trades. Includes grey-list/UPSI restrictions, defaulter tracking, and RBAC with bcrypt auth.
- **Novus UPSI** — Structural digital database governing access to Unpublished Price Sensitive Information for SEBI-regulated BFSI clients.
- **Employee Leave Management System** (Internal) — Built the full leave lifecycle: application, manager approval with auto-escalation to HR, balance tracking, and configurable approval rules — used daily by all Infomatics staff.
- **Compulse** — Co-built compliance reporting platform automating 67+ SEBI report types across 43 maker-checker workflows; currently in UAT with a leading financial institution.
- **CAS Parser** — Python desktop app (Tauri + PyInstaller) that extracts Demat holdings, mutual fund data, and transactions from unstructured CDSL PDF statements using PyMuPDF, tabula-py, and Pandas.

Stack: Python · FastAPI · React · TypeScript · PostgreSQL · Docker · Azure DevOps · Tauri · PyInstaller

Independent Developer — Freelance

Healthcare Client · Mumbai (Weekend Engagement)

2024 – Present

- **Biometric Attendance & Salary System** — Replaced a fully manual process (staff hand-logging machine times into Excel and computing salaries with manual formulas) with an automated system for 8 employees: ZKTeco SDK syncs attendance in real time, with a salary engine handling 30-day cycles, PL accrual, and overtime/deduction logic automatically. Built web (FastAPI + React, live at attendance-sigma-one.vercel.app) and mobile (Expo, Android APK via EAS) end to end.
- **HospitalSop Portal** — Next.js portal hosting SOP video walkthroughs for staff training, organised by category.
- **NSA Sports Platform** · nsasports.co.in — Role-based platform where players register individually or under a club; admin reviews documents and approves/rejects with automated reason emails, fully configurable via CMS without code changes.

Stack: FastAPI · React · Next.js · Supabase · Railway · Vercel · Expo · ZKTeco SDK · Tailwind CSS

INDEPENDENT PROJECTS

Java QR Attendance System · github.com/Naazkn13/java-qr-attendance-system

- Desktop app (Java Swing + MySQL) — webcam scans employee QR codes for punch-in/out, blocks early checkout, and gives admins a live dashboard for managing employees and records.

Stack: Java · Java Swing · MySQL · JDBC · Webcam QR Scanning

SKILLS
