PROFESSIONAL SUMMARY

Backend-focused Software Developer with 14 months of enterprise product engineering experience shipping 4 production RegTech platforms. Proven track record architecting automated SEBI compliance reporting, insider trading (PIT/UPSI) governance, and financial document extraction pipelines. Core stack: Python, FastAPI, PostgreSQL, REST APIs, and Docker, with end-to-end delivery from database architecture to Azure DevOps CI/CD deployment.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, JavaScript, Java

Backend & APIs: FastAPI, REST APIs, Pydantic, SQLAlchemy, PyTest, Microservices, AsyncIO, Node.js

Databases & Storage: PostgreSQL, Supabase, Redis (Caching), Database Indexing, Schema Design

DevOps & Cloud: Docker, Azure DevOps, Git, GitHub Actions, Linux (Ubuntu), CI/CD Pipelines, Postman

Document & Data: PyMuPDF, Tabula-py, Pandas, Unstructured Data Parsing, RegTech Pipelines

Domain & Architecture: SEBI Regulatory Reporting, Maker-Checker Workflows, RBAC, Audit Logging, PIT/UPSI

PROFESSIONAL EXPERIENCE

Infomatics Services Pvt. Ltd. — Software Developer

Mumbai | June 2025 – 24 July 2026

Novus Comply & Novus UPSI (Enterprise RegTech & Trade Surveillance)

- Automated Pre-Clearance Engine:** Engineered multi-tier trade surveillance workflows reconciling 4 enterprise datasets (ECAS, BENPOS, KFin, CAMS) in real-time, eliminating manual cross-checking and flagging 100% of restricted insider trades.
- Access Governance & Compliance:** Implemented granular Role-Based Access Control (RBAC) and bcrypt authentication across all user tiers, enforcing SEBI PIT grey-list restrictions with tamper-evident audit logs.
- Performance Optimization:** Designed asynchronous FastAPI endpoints backed by indexed PostgreSQL queries, ensuring sub-second response times across compliance audit queues.

Compulse (Regulatory Reporting Platform)

- Reporting Automation:** Co-developed enterprise platform automating 67+ SEBI reporting types across 43 maker-checker workflow stages and 32+ automated email triggers; successfully deployed into UAT for a leading financial institution.
- Validation Layers:** Built standardized Pydantic data validation schemas across heterogeneous data sources, eliminating cross-departmental submission errors.

CAS Parser (Financial Document Extraction Desktop Pipeline)

- Unstructured PDF Extraction:** Built an automated Python desktop application (Tauri + PyInstaller) parsing Demat holdings, transactions, and mutual funds from unstructured CDSL statements using PyMuPDF and Pandas.
- Accuracy & Efficiency:** Processed 500+ CDSL statements/month with 98% extraction accuracy, eliminating 10+ hours/week of manual compliance data entry for operations teams.

Employee Operations & Leave Management System

- Delivered full-stack operational system supporting 50+ active employees with real-time balance dashboards, configurable approval rules, and automated escalation logic, reducing administrative processing time by 60%.

KEY INDEPENDENT PROJECTS

Biometric Attendance & Salary Engine — [attendance-sigma-one.vercel.app](#)

FastAPI • React • Supabase • Expo • ZKTeco SDK

- Hardware Integration & Automation:** Deployed end-to-end attendance system for 8+ eye hospital staff with real-time ZKTeco biometric synchronization, replacing manual Excel logging and reducing monthly payroll computation time from 2+ hours to under 30 minutes.
- Payroll & Mobile App:** Built payroll engine handling 30-day pay cycles, paid leave accrual, overtime, deductions, and automatic payslips; distributed cross-platform mobile check-in via Expo Android APK.

NSA Sports Platform — [nsasports.co.in](#)

Production Live • Next.js • Node.js • MongoDB • RBAC

- Player & Club Management:** Architected a live sports operations platform managing 50+ active players with multi-tier registration, club affiliations, and automated document verification workflows.
- Workflow Automation:** Built role-aware administrative dashboards with automated approval/rejection decision triggers and instant notification emails, cutting manual review turnaround time by 70%.

EDUCATION

BSc in Information Technology — Bhavan's College, Mumbai University

2021 – 2024

CERTIFICATIONS

Advanced Program in Java Full Stack Development — DVOC Institute (Skill India / NSDC)
